

CircleCi Pipeline

Note that project is imported to private repository in student Github account and CI is done in private CircleCI account.

The screenshot shows the CircleCI interface for a project named 'sept-tmp'. The left sidebar contains navigation links: Pipelines, Projects, Organization Settings, and Plan. The main area displays a table of pipeline runs. The table has columns for Pipeline, Status, Workflow, Branch / Commit, Start, Duration, and Actions. The pipeline runs are listed in descending order of time. The most recent run, #34, is a 'Success' status, with a duration of 2m 39s. It shows a workflow 'build-deploy-qa' on the 'develop' branch, committed by 'bbcc84d'. The workflow steps are 'build_and_deploy', 'build_frontend-qa', and 'build_frontend'. The previous run, #33, is a 'CREATED' status with 'No workflow'. The run before that, #32, is a 'Failed' status with a duration of 1m 44s. The run before that, #31, is a 'Failed' status with a duration of 1m 28s.

PIPELINE	STATUS	WORKFLOW	BRANCH / COMMIT	START	DURATION	ACTIONS
sept-tmp #34	Success	build-deploy-qa	develop bbcc84d Imported from team project	7m ago	2m 39s	
	Success	build_and_deploy			2m 25s	
	Success	build_frontend-qa	develop bbcc84d Imported from team project	37m ago	2m 11s	
	Success	build_frontend			44s	
	Failed	build-deploy-qa	develop bbcc84d Imported from team project	37m ago	1m 22s	
	Failed	build_and_deploy			1m 12s	
sept-tmp #33	CREATED	No workflow	master 518352e Edit config file	1d ago	—	
sept-tmp #32	Failed	build-qa	develop e4093f8 Edit config file	1d ago	1m 44s	
	Failed	build			34s	
	Canceled	build-deploy-qa	develop e4093f8 Edit config file	1d ago	1m 8s	
sept-tmp #31	Failed	workflow	master 4c051c1 Fixing config file	1d ago	1m 28s	

#34 – build-deploy-qa is reran after adding environment variables in CircleCi project settings

The screenshot shows the CircleCI interface for a project named 'sept-tmp'. The left sidebar contains navigation links: Pipelines, Projects, Organization Settings, and Plan. The main area displays a table of pipeline runs. The table has columns for Pipeline, Status, Workflow, Branch / Commit, Start, Duration, and Actions. The pipeline runs are listed in descending order of time. The most recent run, #30, is a 'Failed' status with a duration of 1m 2s. It shows a workflow 'workflow' on the 'master' branch, committed by '932c8fe'. The workflow steps are 'build' and 'build'. The previous run, #29, is a 'CREATED' status with 'No workflow'. The run before that, #28, is a 'Failed' status with a duration of 2m 15s. The run before that, #27, is a 'Failed' status with a duration of 1m 16s. The run before that, #26, is a 'Success' status with a duration of 7s. The run before that, #25, is a 'Success' status with a duration of 10s. The run before that, #24, is a 'Success' status with a duration of 10s. The run before that, #23, is a 'Success' status with a duration of 9s. The run before that, #22, is a 'Success' status with a duration of 11s. The run before that, #21, is a 'Success' status with a duration of 15s.

PIPELINE	STATUS	WORKFLOW	BRANCH / COMMIT	START	DURATION	ACTIONS
sept-tmp #30	Failed	workflow	master 932c8fe Fixing config workflow	24h ago	1m 2s	
	Failed	build			57s	
sept-tmp #29	CREATED	No workflow	master b993d4d Added backend and update config file	24h ago	—	
sept-tmp #28	Failed	workflow	master 0fcd75 Add backend api endpoints	1d ago	2m 15s	
	Failed	build			1m 15s	
sept-tmp #27	Failed	workflow	master 9a4ed09 Fix app-dir	2d ago	1m 16s
